## (54) FLIP-TYPE MOBILE PHONE

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a flip-type mobile phone number of required loudspeaker and microphones of which can be decreased.

**SOLUTION:** In the flip-type mobile phone, an upper end of a body case 1 and a lower end of a cover case 2 are connected by a hinge 3, a key operation face is provided to an inner face of the main body case 1 and an image display face is provided to the inner face of the cover case 2. Furthermore, a transmission section 6 is provided to the lower end of the body case 1, in a state where the transmission section 6 is not completely covered, even when the body case 2 is closed. On the other hand, a main reception section exposed to the case inner face is provided to the upper end of the cover case 2, when the cover 2 is open, and an auxiliary reception section 7 exposed to a case rear face is provided to the lower end of the cover case 2. The auxiliary reception section 7 has a function of generating incoming call tone at the arrival of an incoming call, and a user can make a speech with the transmission section 6 and the auxiliary reception section 7, with the cover case 2 in the closed state.
